

I am a concerned citizen. Americans have a right to hear unbiased reporting through the media. I think it's unfair that Colin Powell's son is on the FCC board. I am against removing limits that currently limit the number of TV/radio stations and other media a single company can own. Airwaves are a public resource. The FCC was created to protect the airwaves and should do it's job by limiting even further the number of TV/radio stations and other media a single company can own! Thank you.
